Placings_Not my best day out.....:
Winner's weight: 74
Date: April 26, 2010
Time: 02:06:58 AM

Water conditions:

5' at 6m sloping up 2' at 11.5m, about a foot from bank.

Weather:

Sunny with stiff breeze and showers.

Baits used:

Micro and 4mm Feed pellets dampened with Pineapple flavoured pellet soak.
Expanders pumped in Pineapple flavoured pellet soak.

Soak was prepared to winter strength and was also added to corn.

Feeding:

Fed groundbait, maggot and caster on two lines at 4m for silvers.

Pellets at 6m in deepest part of peg, at 10m just at start of slope and two far bank lines.

Comments:

Had about 10lb of silvers in first hour and then switched to pellet at 6m.
Longish wait for bites and so tried one of far bank lines.

Similar story but switched to very small pieces of corn. Bites were instant.

Tried corn on the 6 and 10m lines and again bites were instant.

Mostly small carp with a few up to 4lb.

Final weight was 62lb of carp and 12lb of perch (including a few on corn).
